

Technical Services

Specializing in the Deltek GovCon suite of products, we get your business software solutions working for you quickly and effectively and keep them running smoothly. We assist you with new system designs, installations, upgrades to existing products, database tuning and application support with full lifecycle management.

Installations/Maintenance/Upgrades

- Provide hardware recommendations
- Design system architecture and network infrastructure
- Software installation and technical configuration
- Technical managed services including routine maintenance on in-house systems, applying hot fixes and patches
- Upgrade software applications to most recent version

Other Services

- Database Platform Conversions
- Server Migrations in-house or cloud-based SAAS
- Database tuning and optimization
- Design disaster recovery and business continuity plans
- Train internal resources to deploy hot fixes, perform system administration tasks and general troubleshooting
