

THE LEXELL BLUE DIFFERENCE MANUFACTURING

Deltek

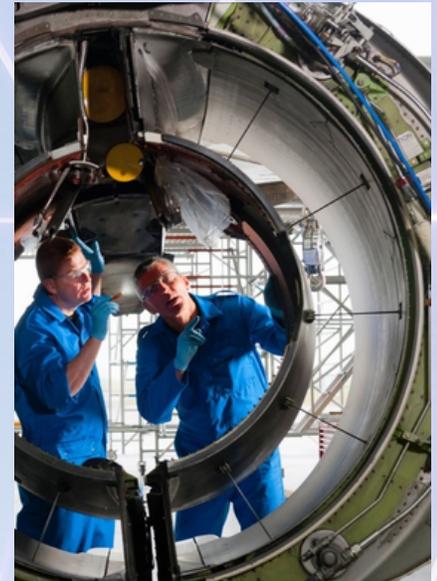

Premier Partner

Costpoint Manufacturing offers a robust toolkit designed to propel digitization and automation throughout the manufacturing process. Tailored specifically for government contractors, Costpoint Manufacturing seamlessly integrates project accounting, inventory and materials management, supply chain management, shop floor operations, and quality assurance into a single, scalable, and secure solution.

BENEFITS

- 1 Automate finance-production interactions for accurate cost traceability, ensuring compliance with financial regulations at unit and part levels.
- 2 Strong project-based MRP calculations ensure on-time delivery while minimizing stock on hand.
- 3 Boost productivity by creating sales orders while managing shipping and invoicing simultaneously.
- 4 Enhance accuracy in materials estimation and Bill of Materials (BOM) by accessing real-time insights into inventory and parts availability.
- 5 Employ adaptable dashboards and planning instruments to enhance visibility and foster a dynamic production workflow.
- 6 Provides full product and inventory traceability by Serial/Lot/UID

Our Clients:

- Aerospace & Defense
- Discrete/Complex Manufacturing
- Engineer/Build to Order
- System Integrators

Our Costpoint Manufacturing Consulting Services:
