

THE LEXELL BLUE DIFFERENCE

COSTPOINT PLANNING MODULE

Deltek Costpoint Planning provides business development, finance, organizational managers and project management professionals with access to up-to-date, accurate information. It serves as a centralized hub for developing, adjusting, auditing, approving and re-forecasting project budgets and annual operating plans.

BENEFITS

1 Budgeting and Forecasting

Develop and manage budgets for opportunities, proposals and existing projects. Strategically plan and allocate resources. Create annual operating plans.

2 Resource Planning

Ensure optimal utilization by managing resources across multiple projects, by individual, team or workforce.

3 Real-Time Data

By seamlessly integrating with other Costpoint Domains, Planning leverages real-time data on costs and revenue to maintain control over evolving projects.

4 Planning Modules

Planning modules can be used or implemented together or separately. The modules are Project Budgeting, New Business Budgeting, Organization Budgeting, Resource Planning and Administration (which supports all other Planning modules).

5 Scalability

Planning is suitable for businesses of all sizes, from small to larger enterprises it accommodates a wide range services and product-centric use cases.

Lynda Porter is Lexell Blue's newest Platinum consultant, specializing in the Costpoint Planning Domain. While she is new to the team, Lynda brings extensive Costpoint experience with an innovative approach, responsible problem-solving skills and strong work ethic.
