Meet and Leverage Lexell Blue's Materials Management & Supply Chain Expertise

TIM HOEFER
Principal Consultant

Since joining Lexell Blue in 2016, Tim Hoefer has been a key Platinum Subcontractor and Principal Costpoint Materials Consultant, bringing over 30 years of ERP experience in manufacturing, scheduling, production, and inventory control. Since 2006, he has played a pivotal role in Deltek Costpoint implementations, leveraging best practices and process improvements. With hands-on experience as a Production Control Manager and expertise in supply chain management, he bridges operational needs with system capabilities. Applying Lean methodologies like Six Sigma and TQM, Tim enhances efficiency and scalability. Certified in CPIM with a B.S. in Management from Kansas State University, he empowers businesses with data-driven solutions that boost visibility, productivity, and long-term success. Based in Orlando, Florida, he continues helping businesses maximize Deltek Costpoint's potential.

1 ENHANCED INVENTORY ACCURACY

Real-time tracking and visibility within Costpoint ensure precise inventory control, reducing stock discrepancies and preventing overstocking or shortages. This leads to improved order fulfillment efficiency and a more streamlined operation. With expertise in automated tracking and reporting, Tim ensures businesses maintain accurate inventory levels while minimizing manual errors and inefficiencies.

2 OPTIMIZED SUPPLY CHAIN EFFICIENCY

Seamless integration of procurement, vendor management, and material planning enables businesses to build stronger supplier relationships and reduce lead times. This results in cost savings and a more agile response to market demands. By refining procurement and material planning processes, Tim helps clients leverage Costpoint's automation tools to drive efficiency and cost-effectiveness.

3 IMPROVED PRODUCTION SCHEDULING

Advanced MRP capabilities allow for better resource allocation and scheduling, minimizing production delays and downtime. Ensuring materials are available when needed enhances throughput and overall operational efficiency. By optimizing MRP configurations, Tim helps businesses align production schedules with demand forecasts and material availability for a seamless manufacturing process.

4 SCALABLE SOLUTIONS FOR GROWTH

Costpoint's modular design ensures businesses can scale effortlessly as they expand, adapting to new operational requirements without costly system overhauls. This flexibility allows companies to focus on innovation and growth. By designing adaptable Costpoint solutions, Tim helps businesses future-proof their systems, reducing the need for frequent reconfigurations.

5 REGULATORY COMPLIANCE & AUDIT READINESS

Automated compliance tracking and reporting within Costpoint help businesses meet stringent government and industry regulations. Built-in audit trails and data validation reduce the risk of errors and penalties. With a deep understanding of regulatory requirements, Tim assists organizations in configuring Costpoint for seamless audits and ongoing compliance adherence.
